DATA HOSTING

Complete Hosting Solutions

We can manage all of your storage requirements including: web & email hosting, application hosting, back-up data storage and remote databases.

- Windows 2003, Windows 2000 and Linux
- Over 4 Terabytes of storage
- 24/7 support helpdesk and online tools
- Remote support direct to your computer from anywhere in the world!
- Redundant network architecture
- 3 network operation centers

Secure Hosting

Web hosting packages support all mainstream technologies. Systems are regularly audited by third party organizations to offer true bank industry security on all e-Commerce transactions.

- Self-managed tools to maximize your online efficiency
- 300 domains; over 20 using our payment gateway technologies
- Clients in North America, Europe and Africa
- Over \$3 million dollars passed through our payment gateway last year

Email Hosting

Email service includes spam and virus protection on all accounts. Connect to your email from anywhere with our web mail tool. Support for IMAP, POP3 and all other standard email protocols.

- Currently managing over 1,200 accounts
- Reduce spam by 80%; compared to other providers
- Newsletter distribution through mail lists and managed groups
- BlackBerry and Windows PPC support

Disaster Recovery

Secure your data with automated system and software back-ups to offsite servers. Securely access your data at anytime and ensure that your business operations will not be stalled due to a system failure.
