

Tomahawk Technologies Inc.

I.T. & TECHNICAL SUPPORT

Making A Difference

Tomahawk Technologies began offering technical on-site services in the fall of 2007. These services include all aspects necessary to ensure the healthy operation of your technology investments.

Our system technicians strive to provide the highest level of service, expertise and experience. Our knowledge is always at your disposal to assist with the management of your technology assets at your location or remotely from our operations centre. Some of the hallmarks of our technical support service includes:

- ✓ Microsoft Certified and A+ Certified
- ✓ Formal training for efficient assessment and repair
- ✓ Professional security and network technology training
- ✓ Over 25 years of accumulated technology knowledge

World Class I.T. & Technical Support Services

With the right tools and knowledge, any computer issue can be resolved to your satisfaction!

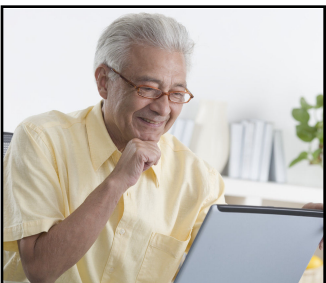

- ✓ Hardware/software installation
- ✓ Network assessment and configuration management
- ✓ Virus, trojan, spyware detection and removal
- ✓ Regular system check-ups and disaster avoidance
- ✓ Data backup and restore or transfer
- ✓ Remote/off-site backup and restore

Professional - Customer service is always our first priority and that is what you can expect from us. We are pleased to consult with you before any work is started on your systems.

Responsive - We offer emergency response to rescue deleted files and relief from disaster. We also offer regular maintenance, system analysis and equipment loaners.

Affordable - Our promise to you is to provide a level of service beyond all others at a fair and reasonable price. We will never bill more than our quote.

We're Here For You

Our relationship with you is paramount. We have a team of extremely talented experts and professionals here to answer your call.

Have questions? Need help? Give us a call, e-mail us or drop by our offices to see why businesses across the region are choosing Tomahawk.
